

Adolescent Intensive Outpatient Substance Abuse Treatment Program

The Center is pleased to now be offering Adolescent Intensive Outpatient Substance Abuse Treatment (IOP) for adolescents aged 13-17.

- ◆ Motivational Enhancement and Cognitive Behavioral techniques are utilized
- ◆ Programming ranges from 12-16 weeks/9 hours per week
- ◆ Peer treatment group with multi-family education and support
- ◆ Focusing on the development of pro-social coping skills

Counselors will encourage positive peer support through modeling appropriate communication. Peer support in adolescence is necessary and serves to motivate youth successfully through the treatment process.

Other services for adolescents that The Center provides include: prevention, early intervention and outpatient treatment.

61 Spring Street, Newton, NJ

*Grant funding is available

For additional information or to initiate the intake process, contact Jane Lupo at (973)383-4787 ext. 234 or email janel@centerforprevention.org.
